ASSESSMENT OF LEARNING OUTCOMES

Educational activities may have different modes of assessment: a final exam with a mark, proficiency assessment (pass or fail) or approval and recognition of a relevant activity (e.g. internships).

Exams with marks and proficiency assessments are taken during exam periods. Exam periods are scheduled in the academic calendar, according to the University's regulations on Educational Activities and on the Academic Career of Students.

The number of rounds a given exam period will have is determined as follows:

- the exam period at the end of the term during which the course was taught will have at least three rounds. The break between rounds must be of at least two weeks;
- in any other exam periods, there will be at least two rounds. The break between rounds must be of at least two weeks;
- in the September exam period, only one round is guaranteed.

When a student passes an exam, the relevant number of credits will be recorded in their academic record.

Exams with marks and proficiency assessments may include: a written test and/or an interview; a written report or presentation; a practical exercise; a computer-based test.

Teachers may decide to set or offer in-course exams. This decision is made on an annual basis and will conform to the academic calendar. In-course exams can contribute to or even substitute the final exam. The above equally applies to activities which do not last an entire term.

In-course exams cannot affect the attendance of other learning activities. An in-course exam schedule must be authorised by the Degree Course Coordinator.

The University's Regulation on Educational Activities gives students the right to take an exam in any round (even consecutive rounds within the same exam period).

Exam rounds scheduled during term time are only for students who have finished attending taught courses and are not aligned with the exam schedule (*fuori corso*). Third-year students are also allowed to take any missed first-year exams during these special exam rounds.
